RE: ONTARIO DIAGNOSTIC CENTRES REXDALE LOCATION INSTALS DIGITAL
MAMMOGRAPHY

Ontario Diagnostic Centres Radiology Associates Rexdale is pleased to announce the installation of a Carestream computer radiography digital mammography system. This will allow the immediate review of clinical images by the technologist while the patient is waiting. It will eliminate the need for film and chemical processing. In addition, the images can now be sent over a digital network and reviewed on high quality workstations.

“This is a superior method for diagnosing breast cancer compared to standard film screening mammography,” said Dr. Murray Miller, Managing Director of Ontario Diagnostic Centres, “It will allow us to do many more patients in the Rexdale area than have previously been screened. We are anticipating entering into the Ontario Breast Screening Program to expand the screening services in this location.”

For further information please contact Radiology Associates Rexdale (416) 746-6397.
