RE: ONTARIO DIAGNOSTIC CENTRES INSTAL ITS THIRD MICRODOSE
MAMMOGRAPHY UNIT

Ontario Diagnostic Centres Radiology Associates Etobicoke Division located in the Etobicoke Medical Centre at Burnhamthorpe & The East Mall is thrilled to announce the installation of a new Sectra Microdose Digital Mammography unit.

“This is now the third unit we have installed and we are astounded by the quality of the mammograms that we are receiving off this equipment. We are continually comparing these mammograms to outside studies done on digital equipment installed in hospitals around the GTA and are amazed by the improvement in image quality and significant dose reduction we are seeing,” said Dr. Murray Miller, Managing Director of Ontario Diagnostic Centres.

“Our technologists also have noted a significantly positive response from women to the comfort features of the new mammographic unit,” Dr. Miller reported. “We look forward to being able to offer this service to women throughout the GTA either through the Ontario Breast Screening Program or through their family doctor referral.”
