RELEASE DATE: May 15, 2011  
RE: FIRST MICRODOSE MAMMOGRAPHY UNIT ARRIVES IN NORTH AMERICA

Ontario Diagnostic Centres Radiology Associates Mississauga location is proud to be the first North American clinical site for Sectra Microdose mammography. This unique digital mammography system allows for high quality digital mammograms to be done at a much reduced radiation dose compared with conventional film mammography and other digital mammography systems.

“We are really amazed by the quality of the mammograms that we are seeing off the Sectra digital system” said Dr. Murray Miller, Managing Director of Ontario Diagnostic Centres. “The images are extremely high quality and are seeing detail we were never able to see on film. We have had cases already where the patients were done on digital mammography units at hospital locations and our images are superior with a fraction of the radiation dose.”

Ontario Diagnostic Centres Mississauga location is now taking referrals from any Ontario licensed physician. In addition, as part of the Ontario Breast Screening Program, we will accept patients over age 50 without a physician referral and enroll them in the Breast Screening Program.

For further information, contact Radiology Associates Mississauga (905) 896-2900.
